September 8, 15, 22, 29

Sign up now on our website in the "Contact Us" tab, for these Fun exciting classes.

Our Website address is,

www.funwithscience.org

Fun and Exciting Classes

Our classes are divided into what we call "ZONES". Each zone consists of fun exciting Creations, projects, Crafts and/or Experiments. Our goal is to build science literacy and unblock the children's imagination. Kids will learn how science is a part of everything we have today.

Basic Course Outline for Monday

Students will learn the difference between an airplane and helicopter, then put them to the test. Other activities include fundamental physics while making their own bounce ball and test them against other balls. Polymer science will include making slime. Lastly they will learn about snakes and take their very own painted wooden snake home. So get in the Zone Now & sign up! Space is limited.

Pricing

This mini-Zone consists of 4 classes. Each class is \$15 per child to attend. Parents are welcome to pay per zone, per class as long as you provide 1 week advanced notice. Full price is \$60 for the full Zone up front. Call / text or e-mail and let us know how you prefer.

Payments may be made through Zelle using robyn@funwithscience.org or by a check/cash in an envelope **marked**, "**Fun with Science**" and with child's name, parents name, along with the dates your child wishes to attend & amount paid. Please drop off the envelope with Donna in the front office. If paying via Zelle please include school name, and your child's name in the memo section.
